

Unpriced Lighting Catalog

Issue 241

eangeetm
home design

Eangee Home Design was founded in October of 2003 and started as a retail store in Lawrence, Kansas. Two years later, we shifted our focus to wholesale and began distributing our lighting products nationally to other retail shops. Now in our 21st year in business, we continue to grow and expand our product lines while maintaining the same principles on which the company was founded.

Eco-Friendly

- We are a founding member of the Sustainable Furnishings Council; a coalition of manufacturers, retailers, and designers dedicated to raising awareness and expanding the adoption of environmentally sustainable practices across the home furnishings industry.
- Our products are manufactured using materials that are sustainably harvested, non-toxic dyes, and water-based finishes.
- The leaves used in our products are collected using methods that do not harm the trees. Additionally, the purchase of the leaves we use in our products provides a secondary income to the farmers who grow and care for plants.

Fair-Trade

- We view ourselves as partners with our manufacturers and continuously exchange ideas on how to improve production, product quality, and the health and well-being of the artisans that work to create the products we sell. We visit our manufacturers on a regular basis to ensure that our core mission is being followed.
- Our products are produced in the Philippines, a country that is fast growing, and progressive on ensuring workers' rights. It is also a country where many companies are run by women and their entrepreneurial efforts are encouraged.
- The artisans who make our pieces are paid a living wage, provided quality housing, have access to continuing education, and work under dignified and safe conditions.

High-Quality

- The lamp frames are constructed from wrought iron that is hand-manipulated and welded into the artisanal shapes. It is then sanded and finished with a powder coat.
- Each leaf is placed by hand on a standard UL lamp backing. The backing adds durability and protects the shade from damage.

Shipping

Eangee works hard to find the best shipping rates available. Unless otherwise specified, we ship using our house account. There are no minimums on opening orders or reorders.

Eangee will cap shipping at 15% for all orders over \$99 of the regular wholesale price on ground and freight shipments to the lower 48 states. Please note, this is a cap and in many cases shipping will fall below the cap no matter what the size of the order. We will always work to get you the lowest shipping rates possible.

There will be times that an item is out-of-stock. Our items are handmade specifically for our market and quality work does take time.

Drop Shipping

Eangee will drop ship to any location within the lower 48 states. A drop ship fee of \$6 per shipment (not per item) will be added and all drop ships are capped at 15% shipping for all orders over \$99 to the lower 48 states. We will drop ship outside of the lower 48 States if you can provide us with a prepaid label with which to ship.

Payment and Contact Information

Send payment to: PO Box 589, Lawrence, KS 66044

Ship to: 600 E 22nd Terrace, Lawrence, KS 66046

Phone: 785-856-2999 x103

Payment email address: AR@eangee.com

Claims, Damages, and Shortages

Please check orders immediately upon receipt. If a problem exists, contact us right away. Shortages and damages must be claimed within 5 days of receiving a shipment including submission of images of damage. Please note the following directions:

- Ground Shipments

Count your boxes carefully and only sign for the number of boxes that you receive. Check the packing list and make sure you received the right number of boxes. Occasionally, a box from a shipment may arrive a day after the other boxes. If there is damage to a box, contact us immediately and we will begin the claims process with our shipper.

- Freight Shipments

Count your boxes carefully on receipt and mark on freight bill any shortages or damage. Immediately open any boxes that show damage, dents or holes and mark such on the freight bill. Contact us and we will resolve all issues with the freight company. If you sign for the freight shipment as being in good condition, then no claim can be made.

- Returns

You must receive written approval from us prior to returning any item. There may be a 20% restocking fee unless a mistake has been made on our part. Merchandise not returned in original packaging or in original condition may not receive credit. Our items are handmade from natural materials, thus, actual colors and dimensions may vary slightly. Most natural materials may adjust a bit in different environments, however, we guarantee that the structural integrity and functionality will not be lost.

Eco-Friendly

Our products are manufactured using materials that are sustainably harvested, non-toxic dyes, and water-based finishes.

Fair-Trade

The artisans who make our pieces are paid a living wage, provided quality housing, have access to continuing education, and work under dignified and safe conditions.

Handmade

Our products are crafted by hand by highly skilled artisans.

Light Bulbs

LED bulbs are extremely energy efficient saving both resources and money compared to standard bulbs. Additionally, LED do not emit any UV light which will better protect the bright and vibrant colors of our lamps.

We highly recommend the use of LED bulbs and even offer them as an add-on for our retailer partners.

Cocoa Collection

Lighting made from chocolate? Not quite, but the cocoa leaves used for these lamps are collected from the same plant from which chocolate is made.

After a process called fossilization, the cocoa leaves are dyed with non-toxic, non-corrosive dye to create the desired color. Only the leaves that remain intact are used on the lamps. The remaining leaves are then used for display and marketing purposes.

Pendant Collection

The pendant lamps are hardwired fixtures that install directly into any standard electrical box.

Each lamp includes all hardware needed for installation and approximately 7' of adjustable, black, pendant cord to set the lamp at the desired height. A clean, black metal ceiling plate caps the fixture at the top.

Banyan Collection

The banyan tree has a unique root system which grows above ground. It is because of its roots and extensive branches that the banyan is widely used for creating bonsai.

Banyan leaves are known for their sturdy yet thin leaf structure. They are round in shape with a pointed tip and can vary in size immensely depending on if they are collected during rainy or dry season.

After a process called fossilization, the banyan leaves are dyed with organic, non-corrosive dye to create the desired color. The sheerness of the banyan leaf can create a water-color effect with gentle bleeding from one leaf to the next.

Only the leaves that remain intact are used on the lamps. The other leaves are then used for display and marketing purposes.

Guyabano Collection

The guyabano tree grows large spiky fruits that are often used in traditional medicines as well as eastern delicacies.

The leaves are evergreen and even though they appear similar to deciduous trees, the leaves are shed and re-grown evenly throughout the year instead of just once a year. This provides a steady and renewable source of leaves that have their own very unique shape.

After a process called fossilization, the guyabano leaves are dyed with organic, non-corrosive dye to create the desired color. Only the leaves that remain intact are used on the lamps. The other leaves are then used for display and marketing purposes.

Jackfruit Collection

Jackfruit is the largest tree-borne fruit in the world weighing as much as 80 pounds and measuring 3 feet across. A common, edible fruit in the South Pacific, the jackfruit is widely served fresh, dried or incorporated into local recipes.

Jackfruit leaves are thick and hardy with an almost rugged appearance. After a process called fossilization, the leaves may feature natural spotting as more of the organic material stays on the leaf than with other leaf types.

The leaves are dyed with organic, non-corrosive dye to create the desired color. Only the leaves that remain intact are used on the lamps. The other leaves are then used for display and marketing purposes.

Paper Collection

The Paper Collection is created from Japanese-style, handmade papers using a variety of traditional and modern techniques. The paper is specifically used for its unique texture and impressive design elements.

Our handmade papers are made from individual layers of paper that are combined in a giant hand press. In some designs, leaves are placed between layers to create added detail. Due to the handmade nature of these papers, the leaves may be partially exposed as layers have slight variation in thickness.

- Foot switch to power on/off
- Uses four A19 medium bulbs

Shade Collection

Our shades are universal, which means they can fit any "washer fitter" lamp base harp. We have consulted lighting retailers to come up with the popular sizes and shapes, and design our shades with real Cocoa Leaves or Banyan Leaves on the outside of the shade.

Outdoor Collection

Introducing the Eangee Outdoor Collection. Every outdoor lamp comes with a water tight electrical system and includes an outdoor light bulb.

The leaves are sealed with an outdoor finish, which makes them hardy and water resistant. All metal work is powder coated while other materials are chosen specifically to withstand the elements and look nice outside over time.

These lamps are suitable for indoor use as well.

Eco-Friendly

It means using materials that are sustainably harvested, non-toxic dyes, and low-impact, water-based finishes.

Fair-Trade

It means the artists who make our pieces are paid living wages, have access to continuing education, quality housing, and a dignified, safe working environment.
